SULHAMSTEAD & UFTON CC CASE STUDY

In 2023, Sulhamstead & Ufton CC approached Berkshire Cricket with a project to adapt the layout of their toilet and changing facilities within their pavilion to provide enhanced facilities for Women & Girls. The previous layout was based around a predominantly male playing community. However, with the number of female members at the club quickly increasing, along with Berkshire girls and schools regularly using the site the facilities needed to be updated.

The project was designed to provide a 3rd changing space which could be utilised when mixed-gender teams are playing as well as providing a place for U18s to change when participating in senior cricket. The project also sought to increase the number of toilets available to female members/visitors. To do this, the club converted the female toilet into a 3rd changing room. The male toilets were adapted to have a series of gender-neutral cubicles. Finally, the club installed partitions in the showers to create more privacy.
